

## Work without strain with Mondolfo Ferro

**THE MONDOLFO FERRO AS 944 LL** super-automatic tyre changer comes equipped with a device that enables the operator to mount and demount any type of tyre without the help of a lever and without the operator exerting physical effort. The manufacturer says the unit is solid and sturdy, and particularly well-suited to intensive use. "The high quality of the components used and severe tests implemented make this machine extremely reliable and minimise maintenance costs," comments Mondolfo Ferro. The AS 944 LL can be obtained with two rotation speeds – 6.5 and 15 r.p.m. – and a tubeless tyre inflation device. It can also be equipped with the 'Super RM' device and an approved kit for mounting and demounting run-flat tyres.

The 'Without Lever' demounting device, when applied to the removal system, completely eliminates the need for physical effort by the operator and guarantees maximum safety for the rim and the tyre, says Mondolfo Ferro. The bead breaker arm allows an opening of up to 410mm, and is fitted with a stroke regulator to eliminate the risk of crushing the tyre. The bead breaker is operated by a double-acting pneumatic cylinder made from 100 per cent stainless steel, generating a power of 15500 N on the blade.
